Introduction

Thai civil aircraft are registered with the national prefix HS-, followed by a three letter individual registration. The individual allocations were generally by default made in operator groups, although in recent years the exceptions have exceeded those following this rule, a prospective operator being free to request any available registration.

An exception to this format was a little-understood series used in the late 1940's and early 1950's. This used a 2 letter operator-related suffix, e.g. 'PC' for Pacific Overseas Airlines (Siam), followed by a 3 number registration.

Aircraft currently-registered (but not necessarily active, or even airworthy) are highlighted in green, thus HS-AAA.

Details of previous and subsequent histories shown in green italics thus *[nnnnn]*

HS-IAM Travel Air 2000 (Curtiss OX-5) c/n "948"
Replica based on the original *"Miss Siam"*; regd 27Dec00 to Foundation for the Preservation and Development of Thai Aircraft (Tango Squadron) [Chiang Mai]; damaged in forced landing in Thailand 18Dec01 and repaired; damaged in forced landing 26 miles south of Lopburi 03Dec02 and repaired; to Tango Squadron c.Oct03; CofA expired 26Oct11; remained parked in Tango hangar at Don Mueang during Nov11 floods; noted at 'Tango' Don Mueang Museum thro' Nov17

Note: the c/n "948" is not correct. This c/n was used when HS-IAM was registered because Tango also held the airframe of the real c/n 948 (ex NC8846, N8846, N99X), did not know the true c/n of the original "Miss Siam" (since provisionally identified, and later discounted, as c/n 435), and did not want to use a fictitious c/n (even though HS-IAM is a replica). At that time the real c/n 948 was not restored to flying condition. However by mid-2003 c/n 948 was also ready to fly, so Tango registered it as HS-PSP with the c/n 435 (see HS-AAA)
